

15 December 2008

Mr. Simon Tan
Wisely Project Management Consultants
40 Jalan Pemimpin #02-06 Tat Ann Building,
Singapore 5771850

Dear Mr Tan:

It brings us a great deal of privilege to present this letter of commendation to Wisely Project Management Consultants for the planning & projects management services rendered to Hitachi Plant Technologies, Ltd's for the "Glaxo Wellcome Manufacturing Pte Ltd's SN02 Singapore Bulk Vaccine Facility" project.

Construction of the 85,000m² biotech vaccine facility in Tuas Biomedical Park started in June 2006. The facility consists of two production buildings, an administration block, quality control laboratories, a power plant and warehousing. Hitachi Plant Technologies, Ltd's scope includes: Building internal finishes for Production clean room, Laboratory areas & associated miscellaneous work.

The new plant produces biologic drugs, which use natural products such as blood or bacteria. The plant is one of the two global sites that produce purified bulk polysaccharides and conjugates, which are further used to produce Glaxo Wellcome 's new pneumococcal conjugate vaccine, meningitis and other vaccines.

We are impressed with the commendable level of commitment and dedication that Wisely's staff had shown towards the project. Their in-depth knowledge of not only the planning software, but of project management and scheduling principles has greatly assisted us in identifying and clearing stumbling block in the project.

We look forward to this collaboration relationship continuing, which we feel will be of great value to both our companies. We thank Wisely again for their continued support and commitment to excellence.

Sincerely,

Lawrence Low Kee Siang
Project Manager
