**LETTER OF COMMENDATION FOR WISELY MANAGEMENT CONSULTANTS**

It brings us a great deal of privilege to present this letter of commendation to Wisely Project Management Consultants for their planning & projects management services rendered to Shell Eastern Petroleum Chemicals (SEPC) "Houdini" BRM project for the period of 2006 to 2009.

The "Houdini" project upgrades the existing Bukom Refinery's process units and constructions of new plants & utilities (BRM & BOS) to provide optimum feed for a world-scale Ethylene Cracker Complex (ECC). The ECC will supply products to existing Shell/Joint Venture plants and new customers and feed the new, latest technology Mono-Ethylene Glycol (MEG) Plant.

BRM scope includes:

- Converting the existing Hydro-Cracker Unit (HCU) for operation in a high capacity, low conversion mode along with 2 Turnarounds (TA1 & TA2)
- Constructing of a new High Vacuum Unit (HVU5) to generate the HCU feed
- Constructing a new Sulphur Recover Unit (SRU6) to manager sulphur from the increased HCU throughout
- Revamping the existing Hydro-Desulphuriser (HDS4) with 1 Turnaround (TA3)
- Installing inter-connections to the ECC
- Modifying pipework across Bukom Refinery

We are impressed with the level of commitment and dedication that Wisely's team had shown towards the works undertaken even during the front-end development stages. Their in-depth knowledge of not only the planning software but of project management and scheduling principles have greatly assisted us in identifying and correcting problems in these projects.

We look forward to this relationship continuing and to the successful completion of the entire Houdini project, which we feel, will be of great value to both our companies. We thank Wisley again for their continuous support and commitment to excellence.

Yours faithfully

Loke Weng Yau  
SEPC – BRM Construction Manager
